PRACTICAL - X

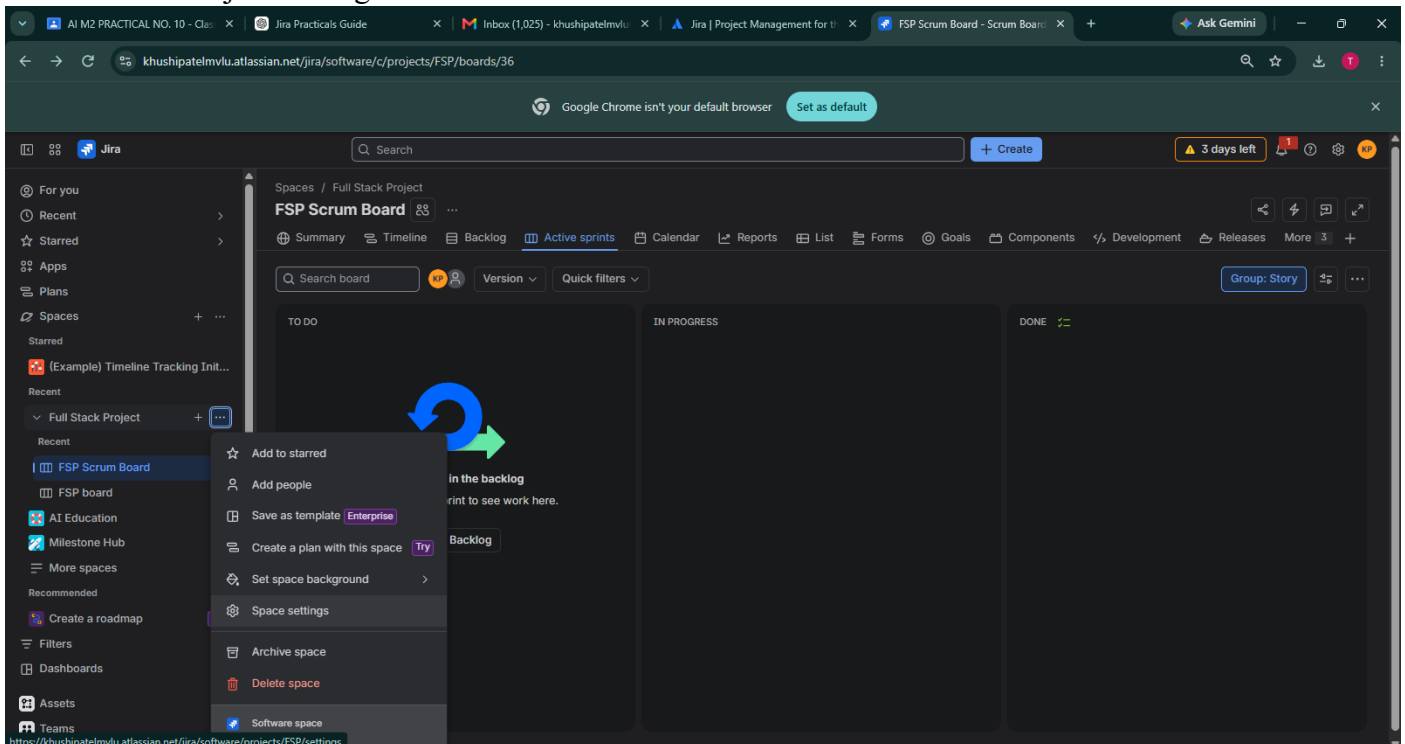

Roll No.: T032	Name: KHUSHI
Class: TYIT	Batch:2
Date of Assignment: 26-09-26	Date/Time of Submission: 26-09-26

Practical 10: Permission & Security Management

A. View and modify Project Permission Scheme.

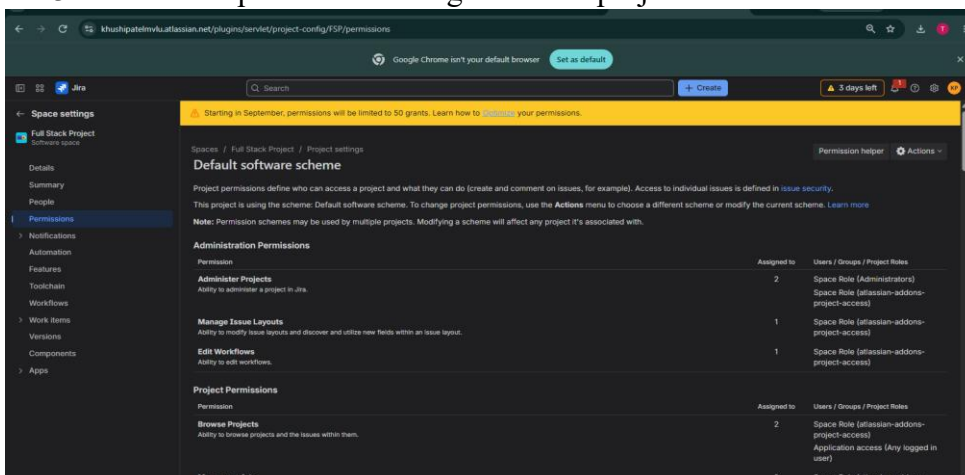

Step 1: Open Jira

1. Open your Jira account.
2. Open the required project.
3. Go to Project Settings.

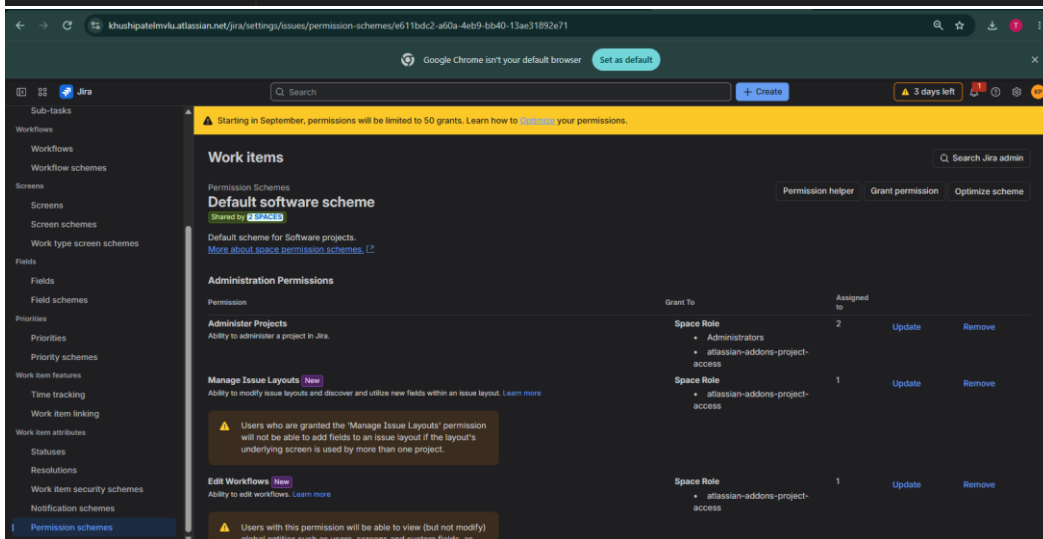

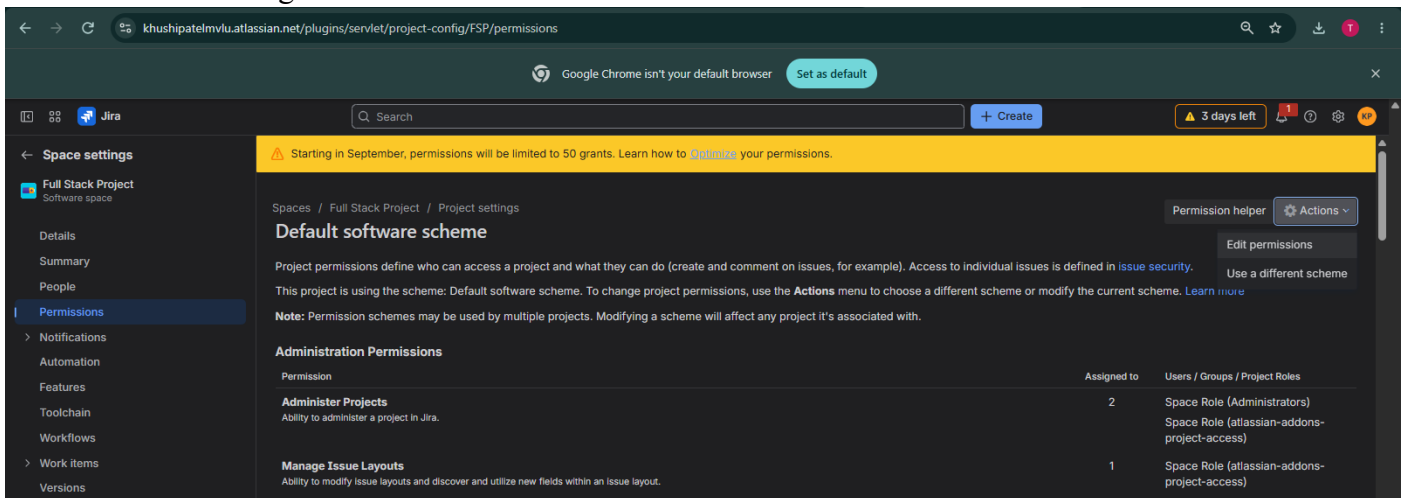

Step 2: Open Permissions

1. In Project Settings, select Permissions.
2. The current Permission Scheme will be displayed.
3. Check the permissions assigned to the project roles.

Step 3: Modify Permissions

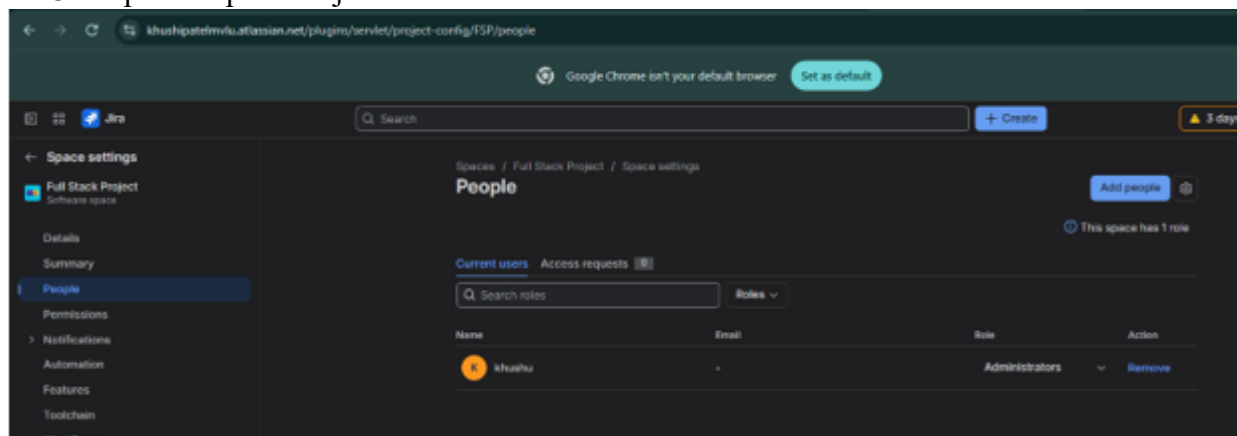

1. Click Actions.
2. Select Edit permissions.
3. Add or modify the required permission.
4. Select the required Project Role / User / Group.
5. Save the changes.

B. Configure Project Roles and assign permissions.

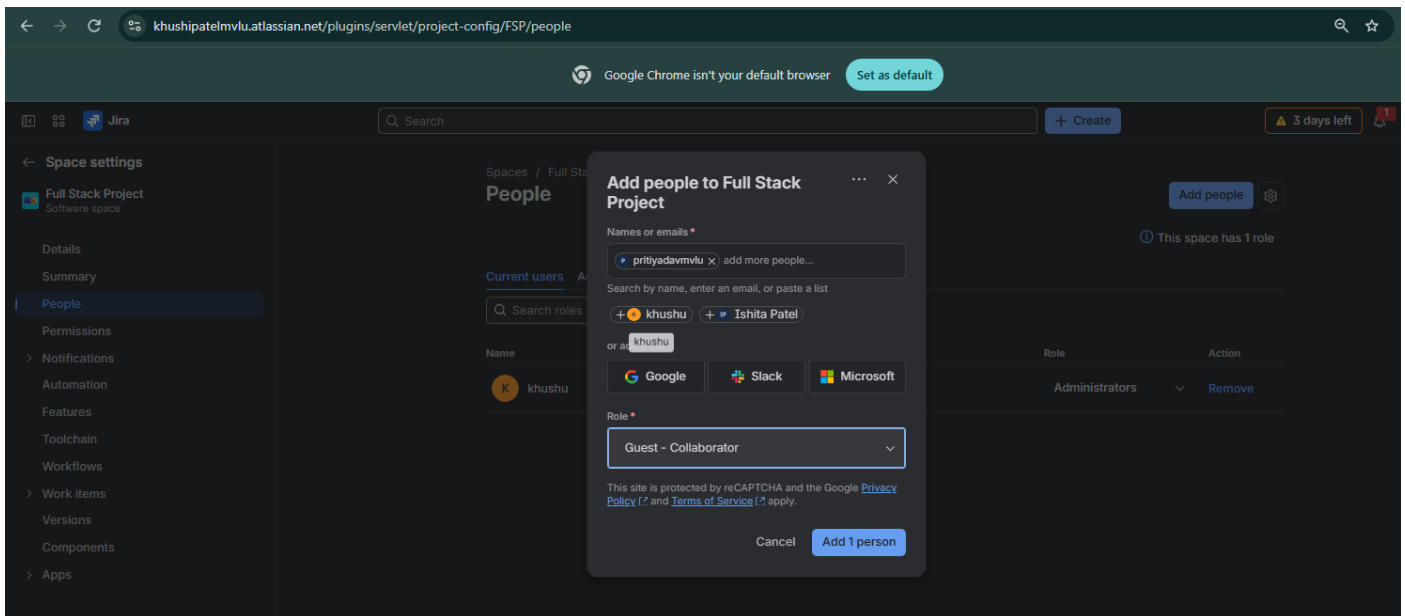

Step 1: Open Project Settings

1. Open your Jira project.
2. Select Project Settings.
3. Open People / Project Roles.

Step 2: Add User to Role

1. Select the required project role.
2. Click Add people.
3. Select the user.
4. Select the required role.
5. Click Add.

Step 3: Assign Permissions

1. Go back to Permissions.
2. Find the required permission.
3. Select the project role.
4. Save the changes.
5. Verify that the user can perform the assigned action.
