PRACTICAL - IV

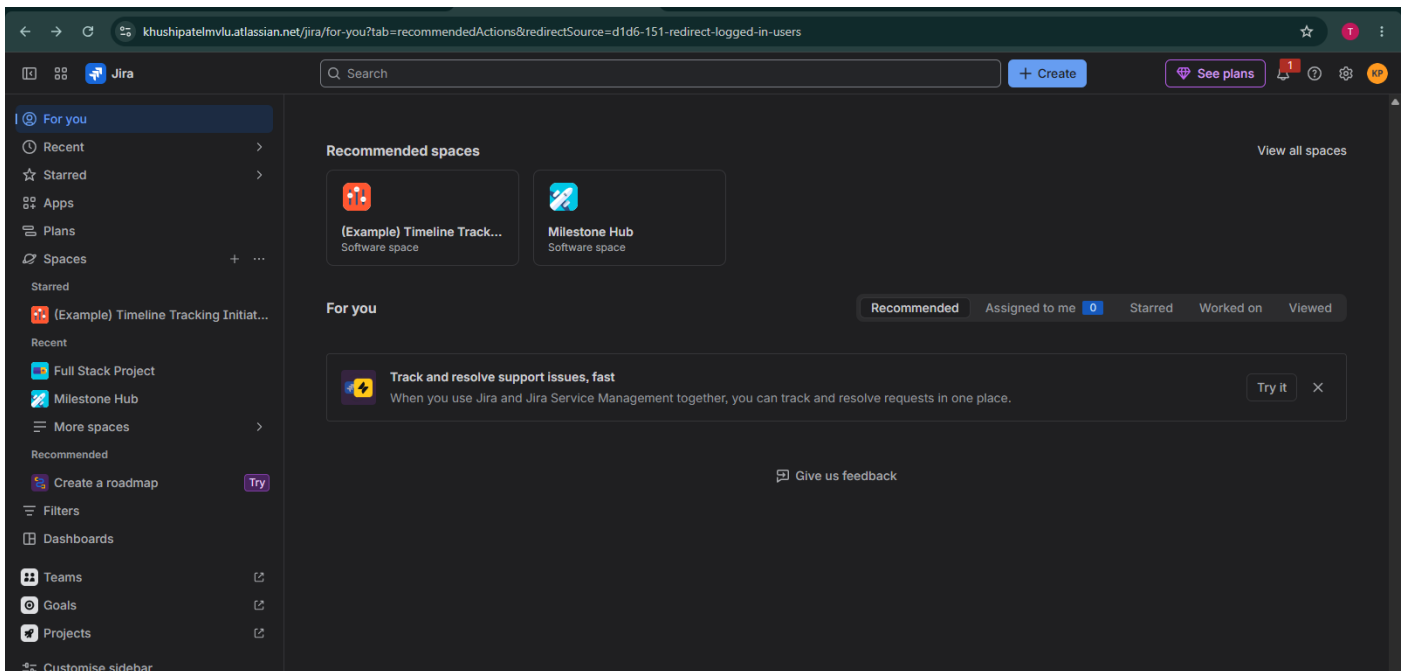

Roll No.: T032	Name: KHUSHI
Class: TYIT	Batch:2
Date of Assignment: 09-09-26	Date/Time of Submission: 09-09-26

Practical 4: Issue Management

A. Create issues under an Epic.

Step 1: Open your Jira project

- B. Open **Jira** and log in.
- C. From the top menu, click **Projects**.
- D. Select the project you created for your practical.

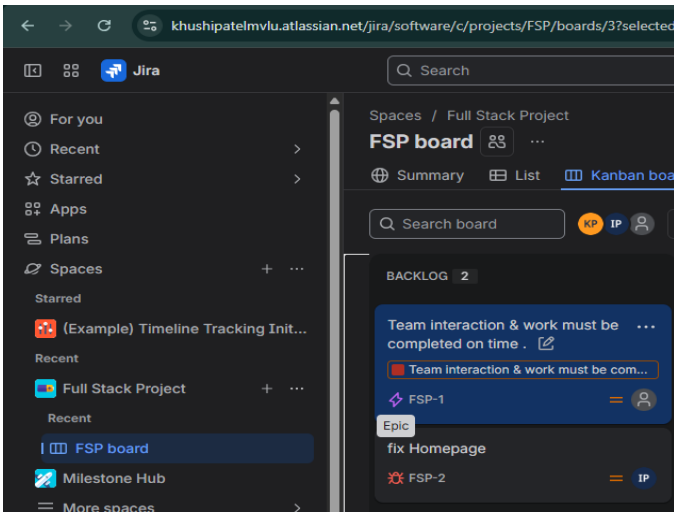

Step 2: Open the Backlog

1. In the left-side menu, click **Backlog**.
2. You will see your project's **Epics** and existing issues.

Step 3: Create an Epic

If you already have an Epic, **skip this step**.

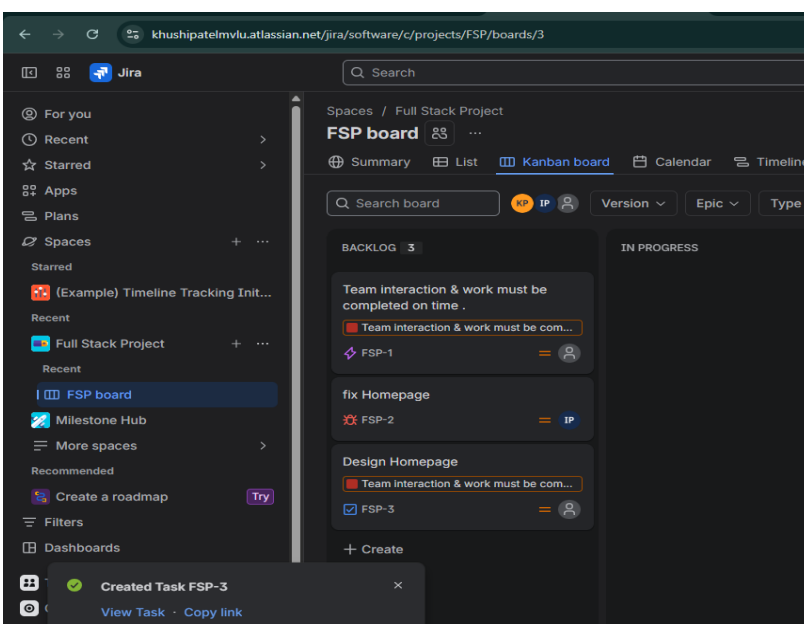

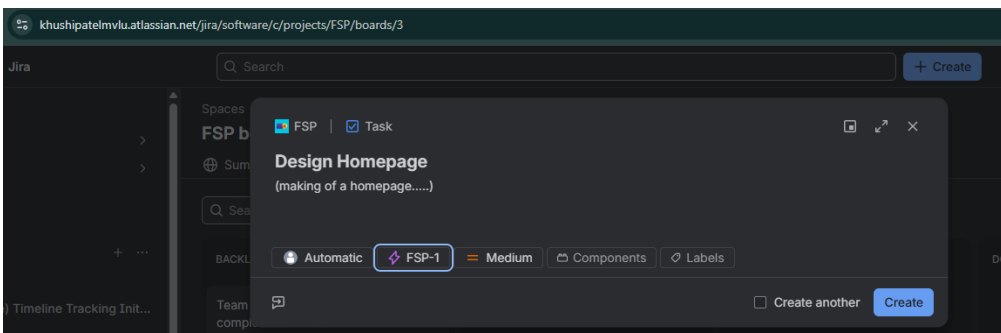

3. In the Backlog, find the **Epics** section.
4. Click **Create epic**.
5. Enter the Epic name, for example:
Website Development
6. Add a short description if required.
7. Click **Create**.

Step 4: Create the first issue

1. Click **Create** at the top of Jira.
2. A **Create Issue** window will open.
3. In **Project**, select your project.
4. In **Issue Type**, select **Task**.
5. In **Summary**, enter:
Design Homepage
6. In the **Parent/Epic** field, select:
Website Development
7. Add a description if required.
8. Click **Create**.

Your first issue is now created under the Epic.

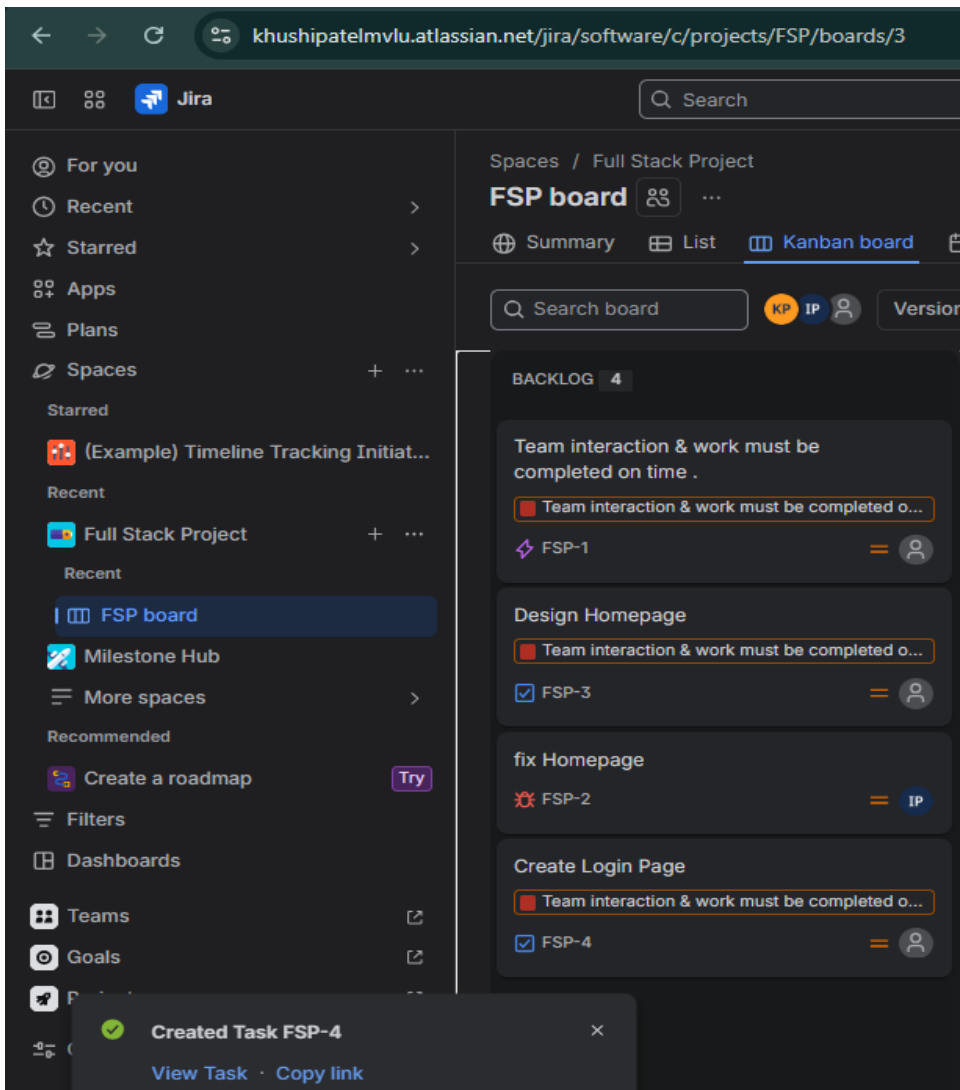

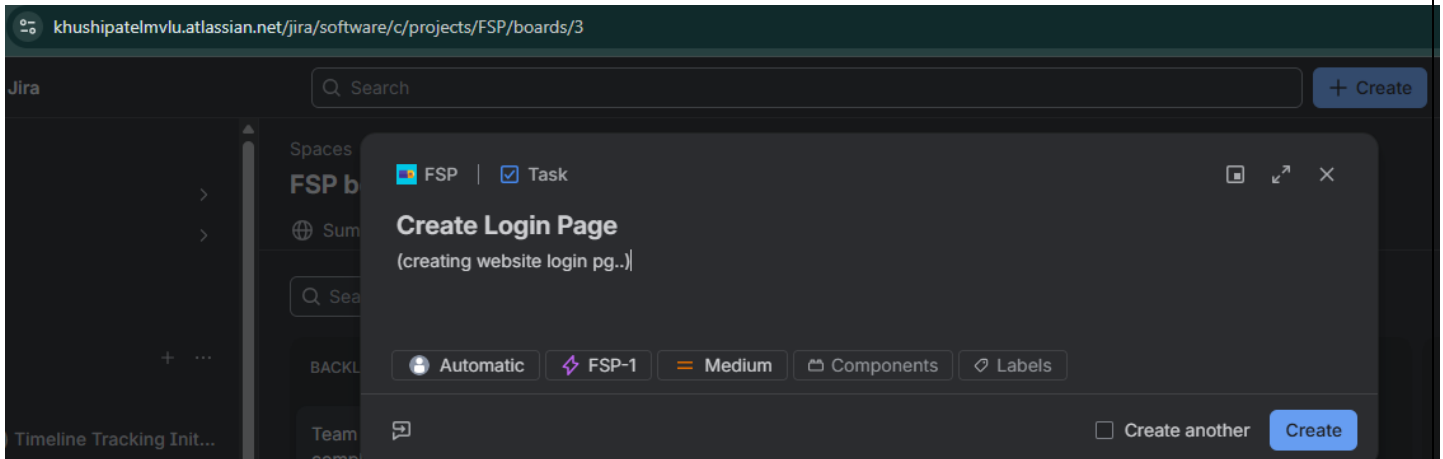

Step 5: Create the second issue

Again click **Create**.

Enter:

- **Issue Type:** Task
- **Summary:** Create Login Page
- **Parent/Epic:** Website Development

Then click **Create**.

Step 6: Create the third issue

Click **Create** again.

Enter:

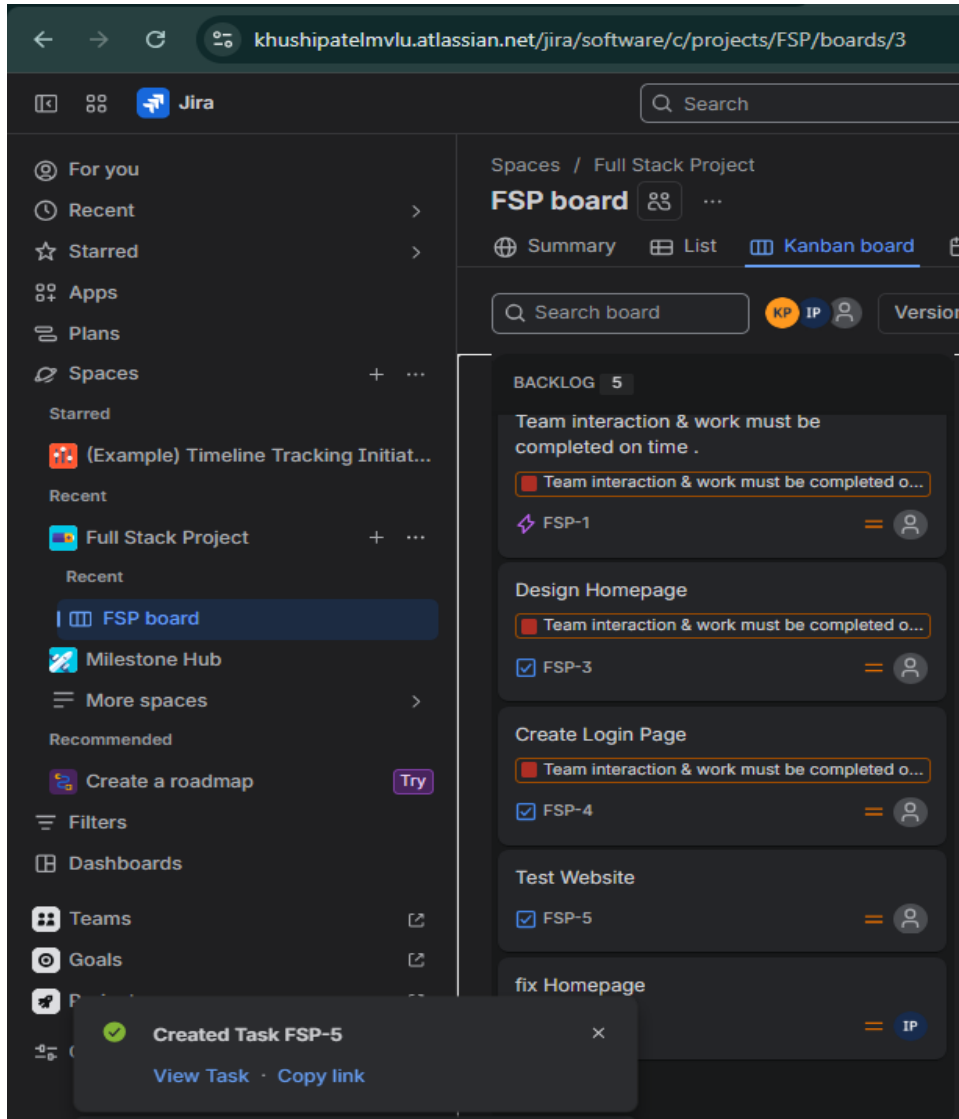

- **Issue Type:** Task
- **Summary:** Test Website
- **Parent/Epic:** Website Development

Click **Create**.

You should now have:

Website Development (Epic)

- Design Homepage
- Create Login Page
- Test Website

B. Assign issues to users and set Priority & Due Date.

1. Open the **created issue**.
2. Click **Assignee** → select the required **user**.
3. Click **Priority** → select **High/Medium/Low**.
4. Click **Due Date** → select the required date.
5. Click **Save/Update**.

Repeat these steps for all issues.
