M2 PRACTICAL - XI

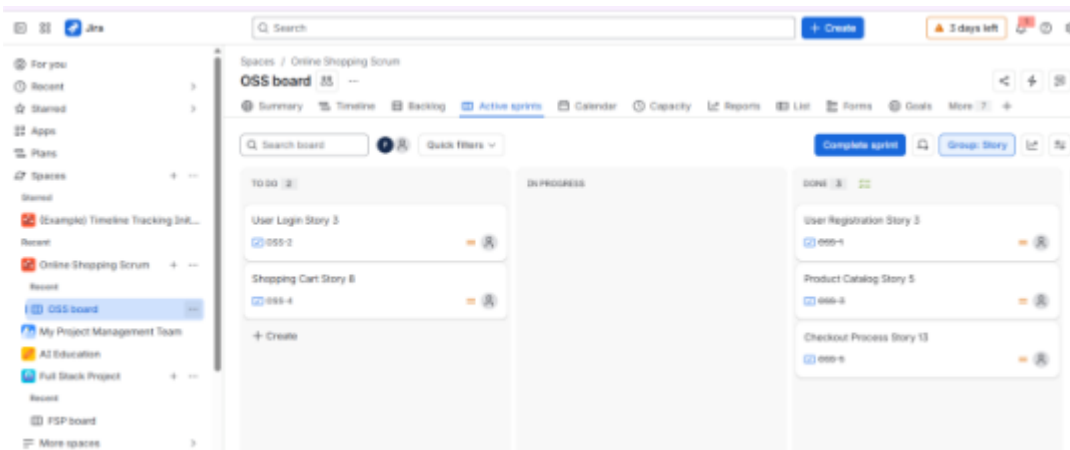

Roll No.: T032	Name: KHUSHI
Class: TYIT	Batch:2
Date of Assignment: 26-09-26	Date/Time of Submission: 26-09-26

Practical 11: Jira Automation

A.Create an Automation Rule (Trigger → Condition → Action).

Step 1: Open Automation

1. Open your Jira project.
2. Go to **Project Settings**.
3. Select **Automation**.
4. Click **Create automation**.

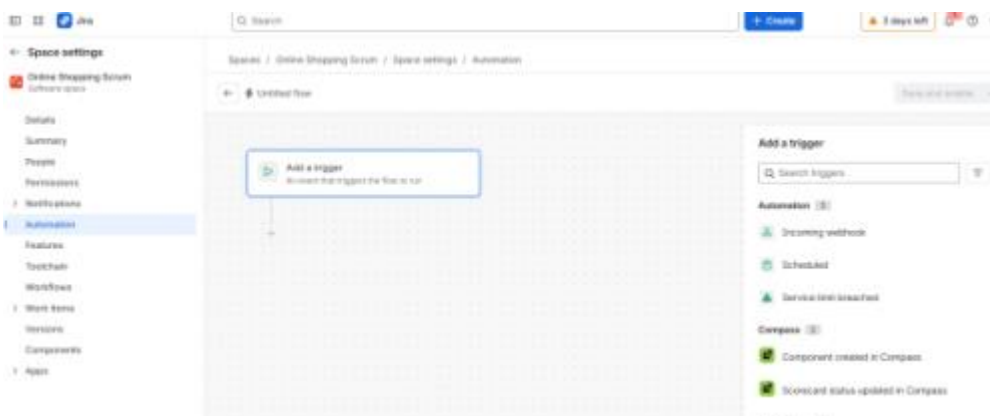

Step 2: Select Trigger

Choose:

Trigger → Field value changed

Then configure:

- **Field:** Status
- **Monitor:** Any changes to the field value

B.Configure rule (e.g., When issue is moved to Done → send email / auto-assign).

For the example “When issue is moved to Done”:

Trigger

When: Status changes

Condition

Set:

Status = Done

Action

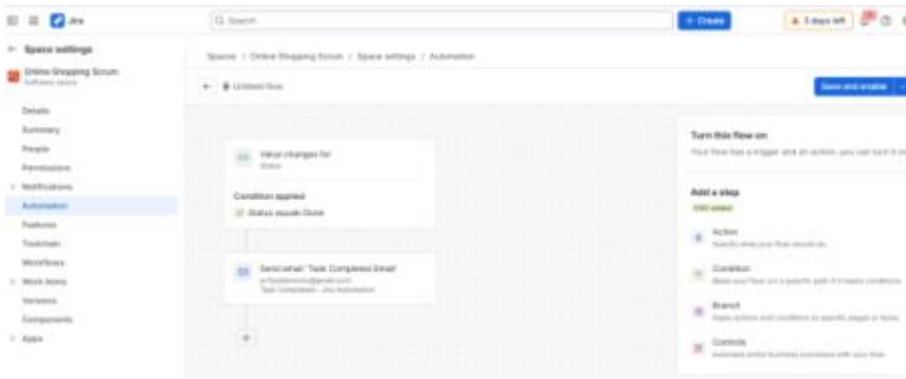

Choose one of the following:

Option 1 – Send Email

1. Select **Send email**.
2. Enter the recipient.
3. Enter a subject , enter the message

The screenshots illustrate the step-by-step configuration of a Jira Automation rule:

- Initial Setup:** The 'Automation' tab is selected in the left sidebar. The main canvas shows a trigger 'Value changes for Status'.
- Condition Configuration:** A condition 'Status equals Done' is added below the trigger. The configuration panel on the right shows the field 'Status' with the condition 'equals' and the value 'Done'.
- Action Configuration:** An action 'Send email: Task Completed Email' is added below the condition. The configuration panel on the right shows the email settings, including the recipient 'jiraprotect@jira.com', the subject 'Task Completed - Jira Automation', and the body content 'Task completed'.

C. Test and enable automation rule.

- Give the automation rule a suitable name.
- Click **Save**.
- Turn the rule **ON**.
- Open a test issue.
- Change its status to **Done**.
- Check whether the configured action is performed.
- Open the **Automation audit log**.
- Verify that the rule executed successfully.
