PRACTICAL - V

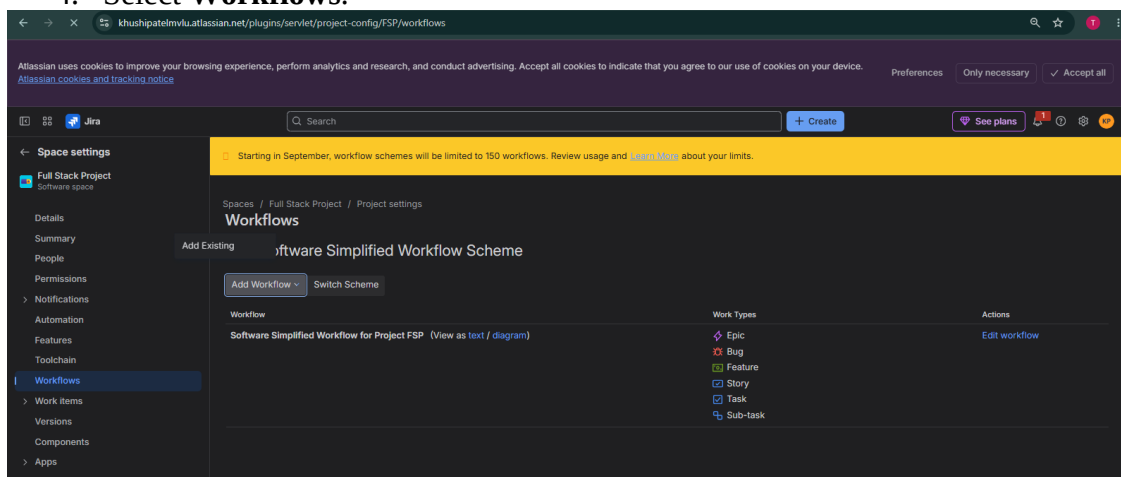

Roll No.: T032	Name: KHUSHI
Class: TYIT	Batch:2
Date of Assignment: 09-09-26	Date/Time of Submission: 09-09-26

Practical 5: Workflow Customization

A. Design a custom workflow

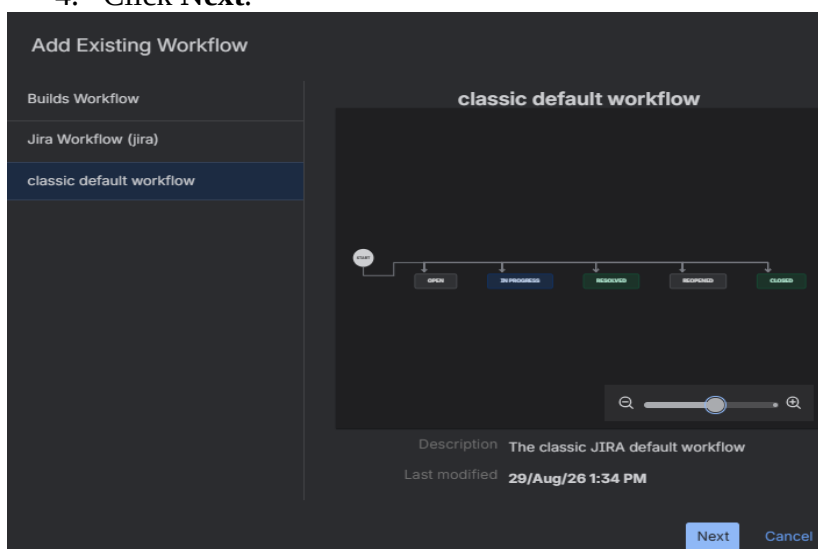

Step 1: Open your Jira project

1. Open your Jira account.
2. Open **Full Stack Project (FSP)**.
3. Go to **Project settings**.
4. Select **Workflows**.

Step 2: Add a workflow

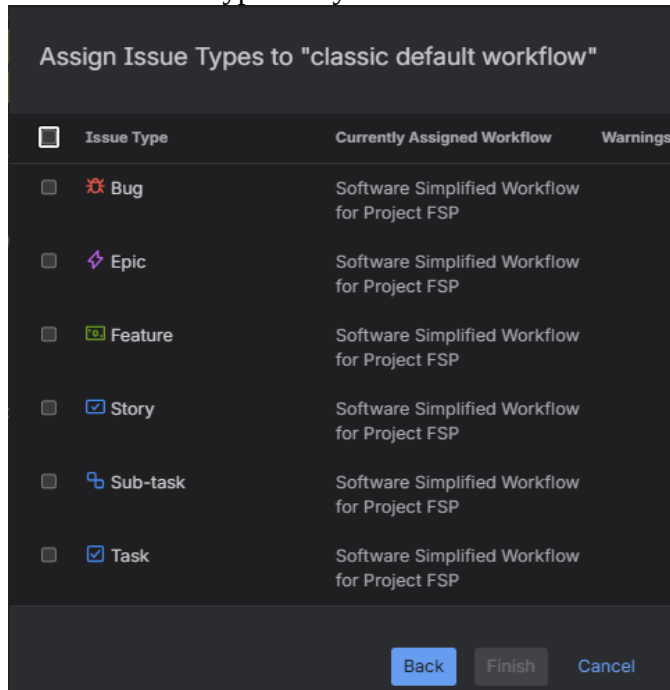

1. Click **Add Workflow**.
2. Select **Add Existing Workflow**.
3. From the available workflows, select:
Software Simplified Workflow for Project FSP
4. Click **Next**.

Step 3: Assign issue types

You will see the **Assign Issue Types** screen.

Select the issue type that you want to associate with the custom workflow

- Select **Epic**.
- Click **Finish**.

Step 4: Check the workflow scheme

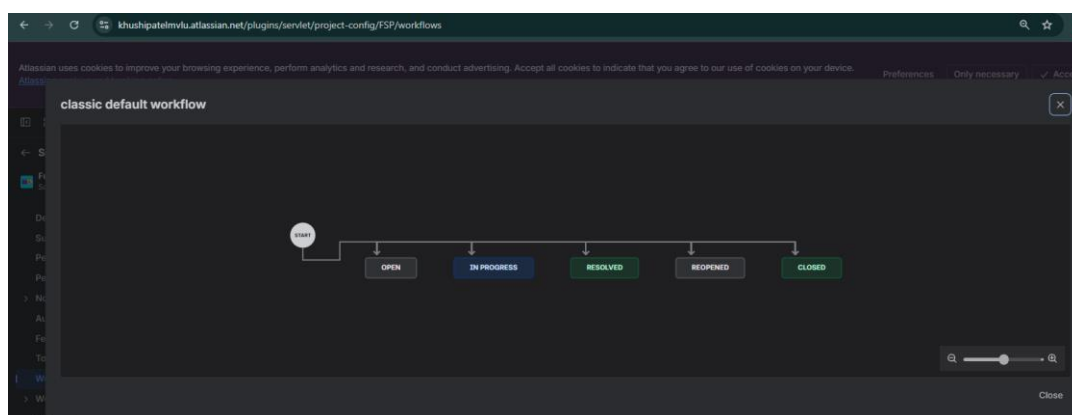

You should now see:

Software Simplified Workflow for Project FSP

under the workflow scheme.

The workflow contains these statuses:

TO DO → IN PROGRESS → IN REVIEW → DONE

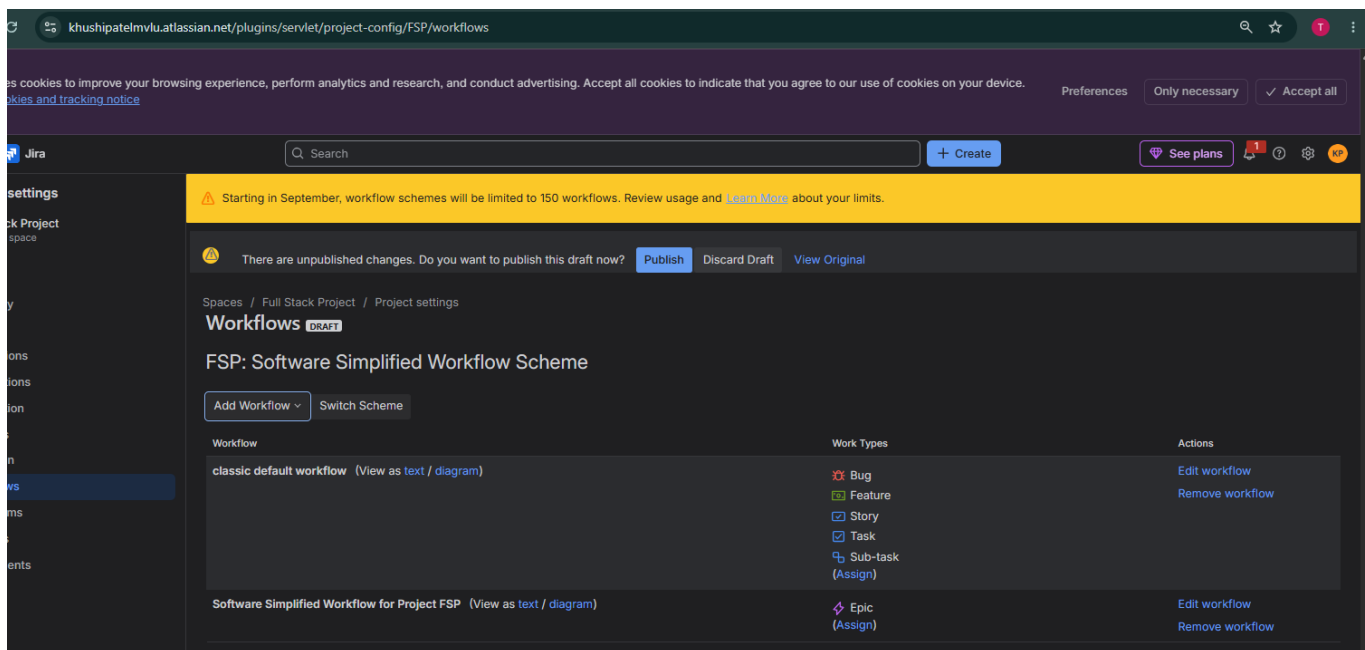

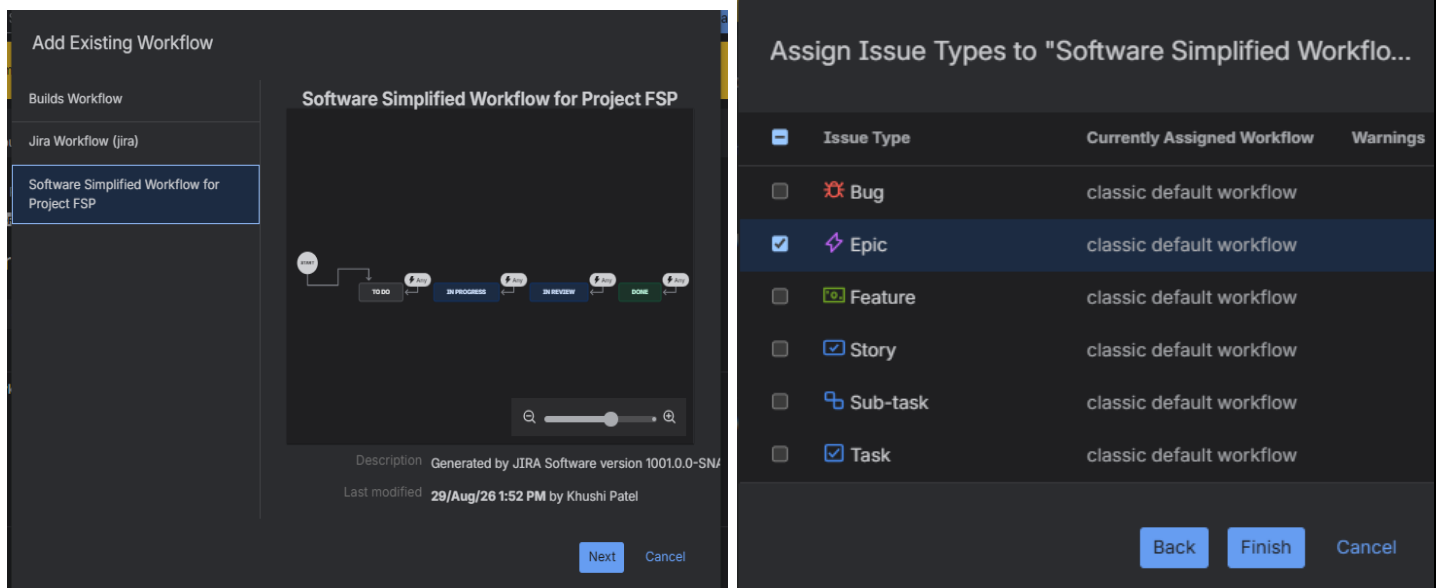

B. Add transitions and conditions.

Step 5: Edit the workflow

1. On the **Workflows** page, find:
Software Simplified Workflow for Project FSP

You should see:

START → TO DO → IN PROGRESS → IN REVIEW → DONE

Step 6: Create the transition

This is the screen you currently have open in your screenshot.

Click **Add Transition**.

Enter exactly:

From status: To Do

To status: In Progress

Name: Start Work

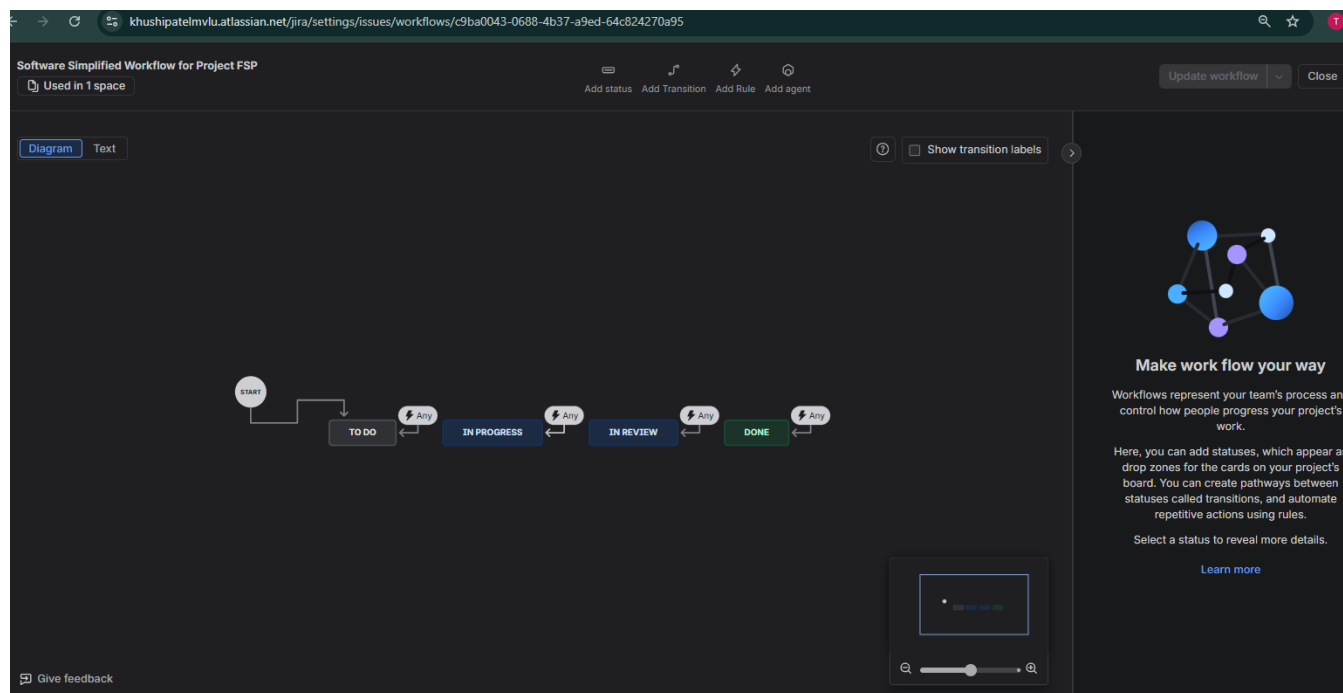

Then click **Create**.

Your PDF shows exactly this transition: **To Do** → **In Progress**, named **Start Work**.

Your current screenshot has **To status** = **In Progress** and the **Name** field empty.

So you only need to:

1. Select **To Do** in **From status**.
2. Keep **In Progress** in **To status**.
3. Type **Start Work** in **Name**.
4. Click **Create**.

Create transition

Transitions connect statuses. They represent actions people take to move work items through your workflow. They also appear as drop zones when people move cards across your project's board.

To reuse a transition, edit the transition and select additional from statuses.

Required fields are marked with an asterisk *

From statuses * To status *

To Do → In Progress

Name *

Start Work

Tip: Name your transition as an action people take to move an issue, like "start work" or "merge".

Cancel Create

Step 7: Add a rule

After creating the transition:

1. Select the **Start Work** transition.
2. Click **Add Rule**.
3. Search for:

Validate that people have a specific permission

4. Select it.
5. Click **Select**.

Step 8: Select the permission

On the **Add Rule** screen:

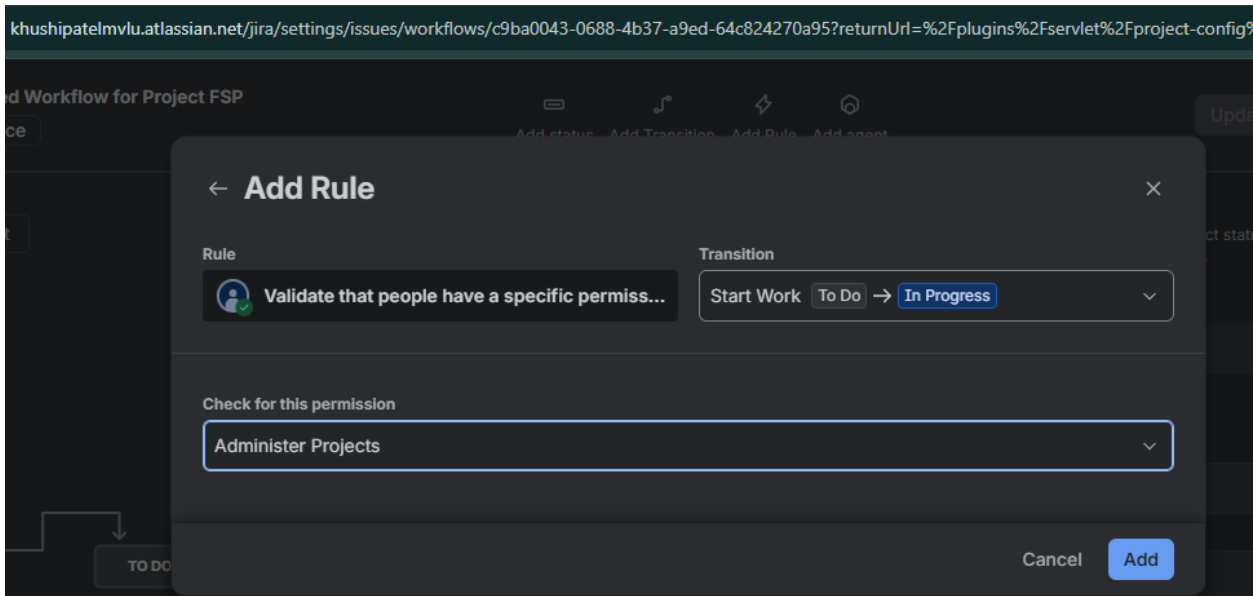

Under **Check for this permission**, select:

Administer Projects

The transition should show:

Start Work: To Do → In Progress

Then click **Add**.

Step 9: Check the final workflow

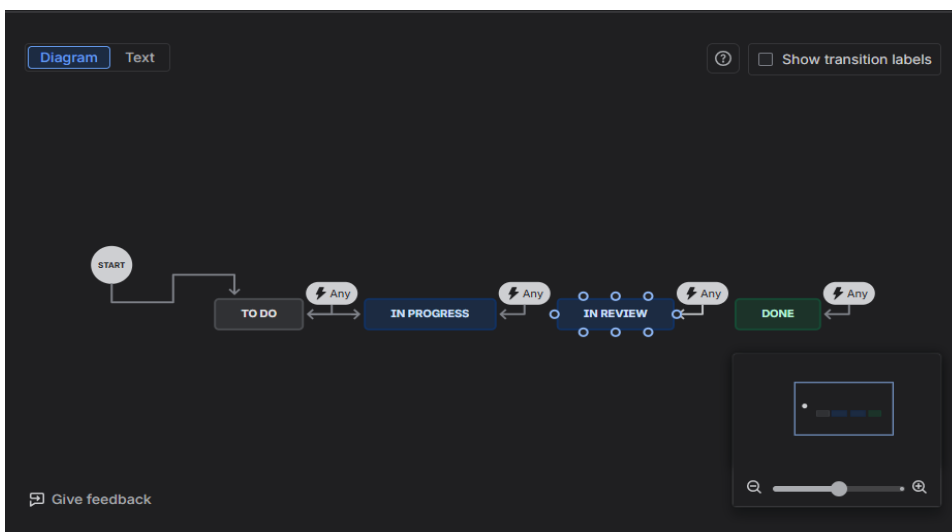

After adding the rule, the diagram should contain:

START → TO DO → IN PROGRESS → IN REVIEW → DONE

The **Start Work** transition connects:

TO DO → IN PROGRESS

and has the permission condition attached.

C. Publish and associate workflow with a project.

Step 10: Update/Publish the workflow

1. Click **Update workflow**.
2. Jira will show the workflow changes.
3. Continue with the workflow update/publish process.

If Jira asks about publishing the draft, click: publish

Step 11: Associate the workflow

Jira will show the workflow association screen.

For the relevant issue types, select the custom workflow:

Software Simplified Workflow for Project FSP

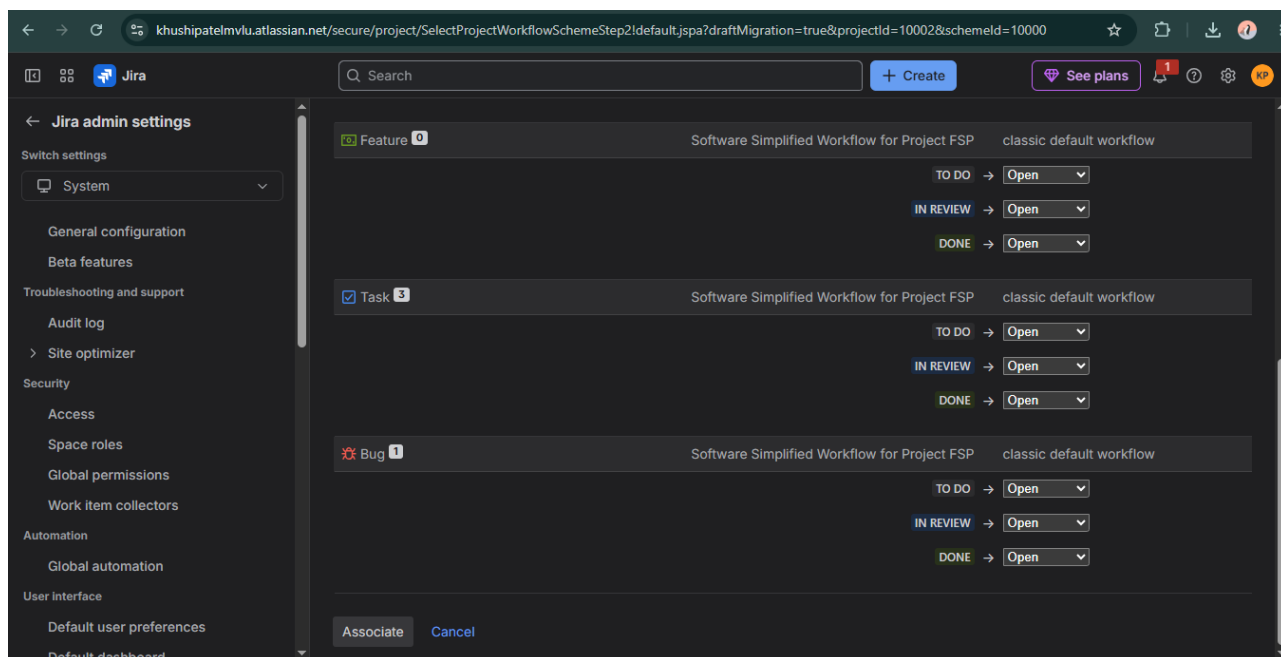

Your PDF shows issue types such as:

- Feature
- Task
- Bug

and the workflow selection screen.

Choose the required issue types and associate them with:

Software Simplified Workflow for Project FSP Then click Associate

Step 12: Complete migration

Jira may ask you to migrate existing work items to the new workflow.

Wait for the migration to complete.

Your PDF shows: **Workflow migration complete**

Then click: **Acknowledge**
