Practical - VII

Roll No.: T032	Name: KHUSHI
Class: TYIT	Batch: 2
Date of Assignment: 12-09-2026	Date/Time of Submission: 12-09-2026

Practical 7: Kanban Board Management

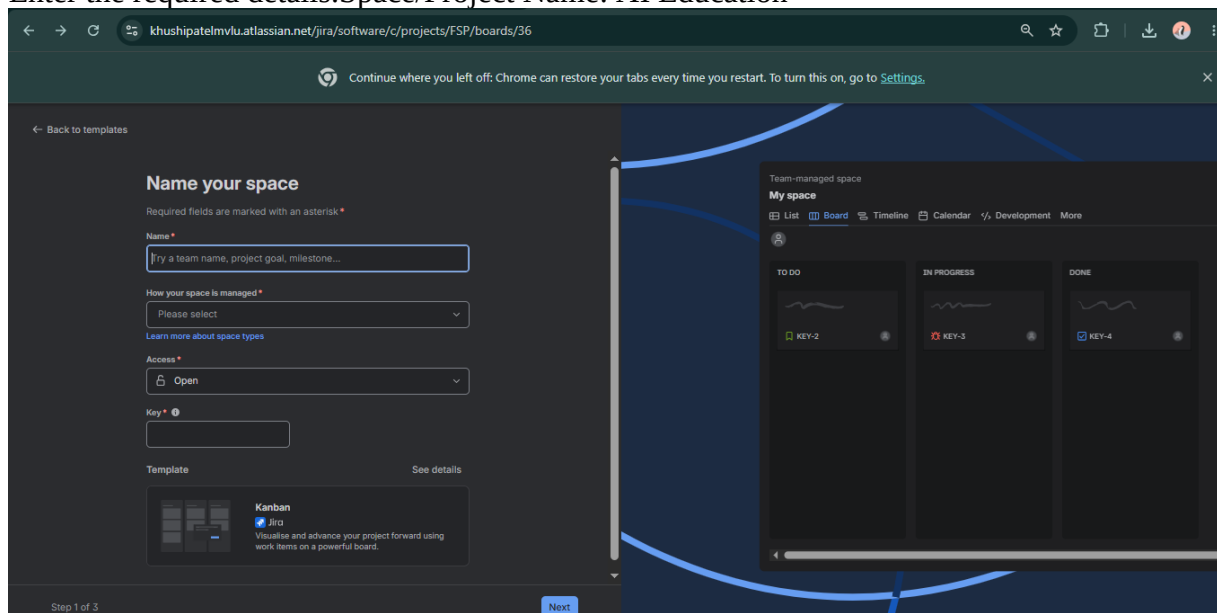

A) Create a Company-managed Kanban Project.

1. Open Jira.
2. Click Spaces from the left-side menu.
3. Click Create Space.
4. The Space templates page will open.
5. Select Kanban.
6. Click Use template.

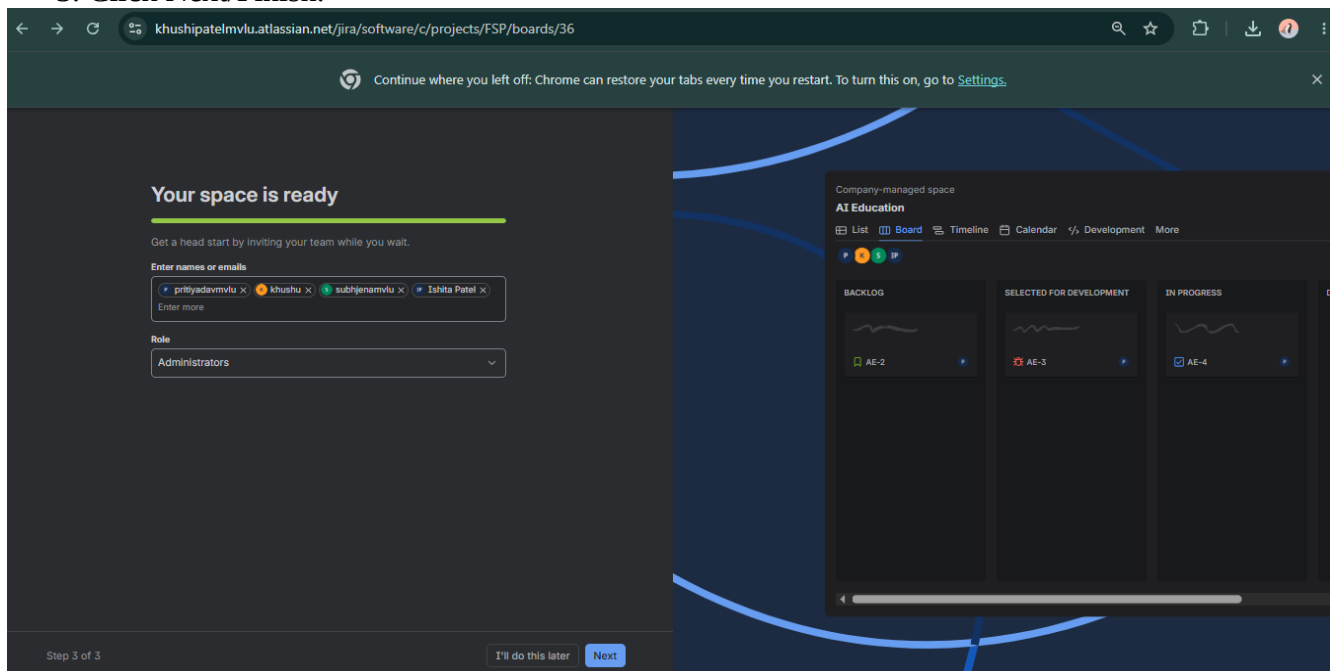

Step 3: Enter Project Details

Enter the required details.Space/Project Name: AI Education

Step 4: Add Team Members

1. Add the required group members.
2. Give them access to the project.
3. Click Next/Finish.

Step 5: Open the Kanban Board

1. Open the newly created AI Education project.
2. Click Kanban board.

The board will display columns such as:

Backlog → Selected for Development → In Progress → Done

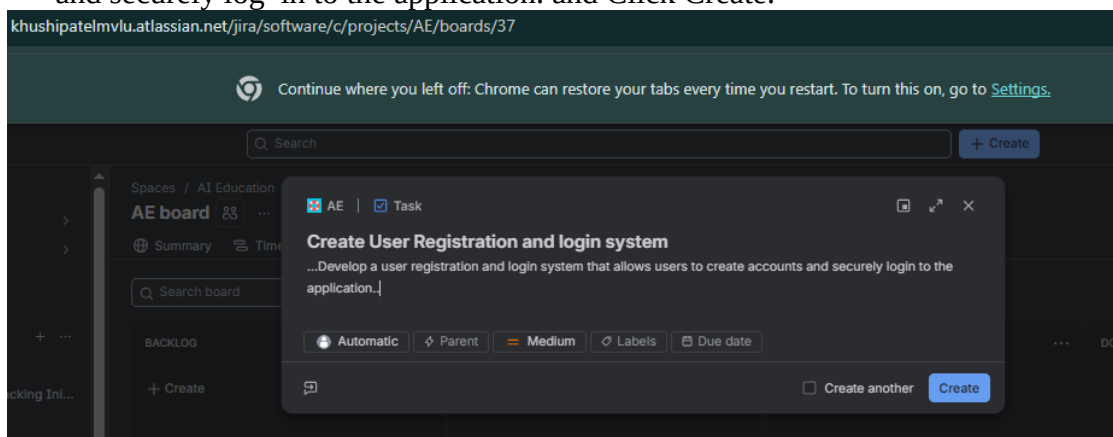

B) Configure Kanban Board

Step 1: Open the Kanban Board

1. Open AI Education.
2. Click Kanban board.
3. Go to the Backlog.

Step 2: Create a Task

1. Click Create.
2. In Issue Type, select Task.
3. In Summary, enter: Create User Registration and Login System
4. In Description, enter: Develop a user registration and login system that allows users to create accounts and securely log in to the application. and Click Create.

Step 3: Assign the Task to a User

1. Open Create User Registration and Login System.
2. Find the Assignee field.
3. Click Assignee.
4. Select your required group member.
5. Save/Update the issue.

Step 4: Set Priority

1. Find the Priority field.
2. Click the Priority dropdown.
3. Select High.
4. Save/Update if required.

Why: Priority shows the importance or urgency of the Task and helps the team decide which work should be completed first. **Step 5: Set Due Date**

1. Find Due Date.
2. Click the date field.
3. Select a suitable date.

Suggested Due Date: 15 September 2026

4. Save/Update.

The screenshot shows the Jira issue page for 'Create User Registration and login system'. The issue is assigned to pritiyadavmlu and reported by Khushi Patel. The due date is set to 15/09/2026, and the priority is Highest. The sidebar on the right contains sections for Details, Development, More fields, and Automation.

Step 6: Verify the Task

Jira

C. Track issue progress and generate Control Chart

Step 1: Open Kanban Board

1. Open AI Education and Click Kanban board.
2. Locate the Task: Create User Registration and Login System

Step 2: Move the Task to Selected for Development

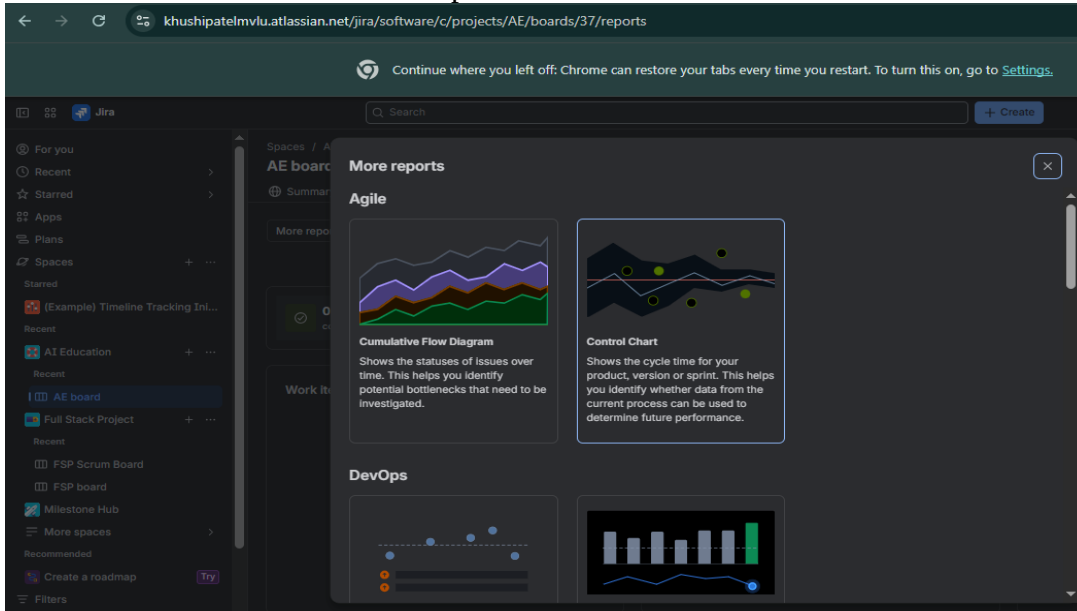

Find the Task in Backlog and Drag and drop it into: Selected for Development

Step 3: Open Reports

Open AI Education and Click Reports then More reports.

Step 4: Open Control Chart

Find Control Chart in the list of reports and Click Control Chart.

Step 7: View the Control Chart

The Control Chart displays information such as:

- Issue
- Cluster of issues
- Average
- Rolling average
- Standard deviation

Result: The issue progress was successfully tracked on the Kanban board and the Control Chart was successfully generated.
